Web Cookies and Beacons

Web cookies (also known as HTTP cookies, or just cookies) are parcels of text that are sent by a server to a Web browser, and then sent back unchanged by the browser each time it accesses that server. In other words, a cookie is a piece of data stored on a user's computer that is tied to information about the user.

Web beacons are objects that are embedded in a webpage or email that are invisible to the user, but allow checking that a user has viewed the page or email. Other names are web bug, tracking bug, tag or page tag.

This website does not use cookies. However, some of the links included may use cookies and web beacons as well. This site has no access to, or control of others' web cookies or web beacons.

If you wish to disable cookies, you may do so through your individual browser options. Please check your browser's help section for instructions on how to do this.
